

THE LONDON SCHOOL
OF ECONOMICS AND
POLITICAL SCIENCE 

This is to certify that

Daria Godorozha

enrolled on the **MA438 Financial Mathematics in Practice** course and attended the seminars organised by the Department of Mathematics in 2025/26

This course bridges the gap between theory and practice and shows how financial mathematics is used in the financial industry. It is taught by experts from the financial industry. In 2025/26, the course covered the practical applications of mathematical finance in trading and risk management, mathematical approaches to generative AI, and counterparty credit risk and xVA.
